

This detailed breakdown outlines the proposed cost and scope for the development and deployment of an **online journal management website** for the **Global Nexus Journal of Multidisciplinary Research (ISSN 3115-5847)**.

Key Features of the Web application base on several roles

Admin Dashboard

- Secure Admin login
- Manage authors, reviewers, editors, and subscribers
- Approve/reject manuscript submissions
- Assign reviewers and monitor peer-review workflow
- Manage journal volumes, issues, and articles
- Manage journal policies, categories, and metadata
- Reports & analytics (submissions, publications, downloads, citations)
- Manage complaints & support tickets
- Content management (announcements, guidelines, news)

Author & Reviewer Dashboard

- Author registration & profile management
- Manuscript submission (upload files, enter metadata, choose category)
- Track manuscript status (under review, revisions, accepted, rejected)
- Reviewer login and manuscript access
- Review submission with comments & recommendations
- Notifications & email alerts (submission updates, review requests, decisions)
- Author dashboard with submission history and accepted papers

Public Website (Reader/Visitor Interface)

- Browse **current and past issues**
- View & download articles (PDF, full text)
- Search & filter by author, title, keywords, or category
- Display **ISSN, editorial board, aims & scope, policies**
- Subscription/newsletter module (optional)
- SEO-friendly pages for visibility on Google Scholar & indexing

Timeline Estimate

Project Development Phase	Duration
UI/UX Design	3 days
Backend Development & Database Setup	7 days
Frontend Development (Public + Author/Reviewer)	7 days
Admin Dashboard Development	4 days
Testing, QA & Bug Fixes	2 days
Deployment (Play Store, App Store, Server setup)	1 day
Total Estimated Duration	3 Weeks

Cost Breakdown Estimate

Project Component	Estimated Cost (₦)
UI/UX Design (Website + Dashboard)	₦ 40,000
Author & Reviewer Panel	₦ 45,000
Admin Dashboard	₦ 43,000
Public website (journal frontend)	₦ 50,000
Backend Development integrations	₦ 50,000
Deployment (Web Hosting Setup)	₦ 114,000
Total Estimated Budget	₦ 342,000
